

## What is the MacPhe PKU Reward programme?

This is a programme where you earn points for sending in your blood samples to the National Testing Centre. You need to send in at **least two blood samples each month to earn one point.**

The idea is that you collect points and then redeem them for vouchers which you can use to buy some goodies.

With the support of Nutricia we have put together a great range of vouchers so you can buy some great things – perhaps a bread maker, or some toys or other gifts for a birthday or Christmas. All of these rewards were suggested by people with PKU.

If there are other rewards/vouchers you would like to see on the list or have any questions please contact MacPhe on 09 570 0984 or [macphe@nutricia.com](mailto:macphe@nutricia.com)

### ***Why are we doing this?***

It's simple – MacPhe's Rewards Programme lets you stay in charge of your levels, encouraging you to test regularly. Ideally we'd like people to sample weekly (and some people like small babies and pregnant women even more often). Remember only two blood tests can earn you the maximum of 1 point per month, any other blood tests will be recorded but your points for that month will not increase.

### ***How do I become part of the programme?***

If you want to be part of this programme you need to enrol. Nutricia and MacPhe are counting the points and organising the rewards.

If you'd like to enrol, you can either

- Download an enrolment form and post the completed form to the National Testing Centre
- Contact us and we will send an enrolment form to you in the mail

*You automatically receive 1 point for joining so enrol now and get with the programme.*

**Under the Privacy Act, the Metabolic Nurse can't tell me if you've tested each month without your permission.**

Note: It is most important that if you've been asked to sample more often that you continue to do what has been recommended.
